Summary

Proactive and curious learner with a strong focus on problem-solving and backend development. I enjoy turning complex challenges into simple, efficient solutions and continuously work on improving system performance and scalability through practical learning.

Education

National Institute Of Technology , Kurukshetra , Master of Computer Applications (MCA)	July 2023 - June 2026
• GPA: 9.07/10	
Devi Ahilya Vishwavidyalaya, Indore , Bachelor of Computer Applications (BCA)	July 2020 - June 2023
• Percent: 76.19	

Experience

Software Engineer Intern 	June 2025 – Aug 2025
• Worked on real time stock market application. • Developed front-end components to display corporate announcements and built end to end APIs for trading logic and stock pattern analysis, showing stocks that meet breakout and behavior scan criteria. • Tools & technologies: ReactJs, Python, FastAPI, PostgreSQL, Dbeaver , Codeberg, Pycharm	

Projects

Upwise	 Live Link
• Ed-Tech Platform: A full-stack web application enabling course creation, enrollment, and learning management for students and instructors. • Implemented secure user authentication and authorization using JWT, and designed RESTful APIs for efficient management of users, courses, categories, and lectures. • Integrated Razorpay payment gateway for seamless and secure course purchases. • Created Mongoose schemas for efficient storage and retrieval of data in MongoDB. • Tools & technologies used: MongoDB, JavaScript, ReactJs, ExpressJs, NodeJs, Postman	
Kanoon Sarathi	 Live Link
• Kanoon Sarathi: A government-funded legal information system developed collaboratively to help legal professionals conduct efficient case research and decision-making through structured search functionalities. • Contributed to developing and enhancing backend APIs for specific and comprehensive search features. • Contributed to improving the interface and overall user experience. • Tools & technologies: Python, Django, Javascript, HTML	

Technologies

Core Subjects: DBMS, Data Structures, Algorithms, Operating System, Computer Networking, OOPS
Languages: C, C++ , JavaScript, Python, SQL, Java, HTML, CSS, Tailwind
Libraries and Frameworks: ReactJs, NodeJs, ExpressJs, Django, FastAPI, Numpy, Pandas
Developer Tools: Git and Github, Postman

Achievements

- Exams: AIR 389 in NIMCET 2023, 249 in VITMCA, 99.65 Percentile in MAHCET
- Solved 1000+ questions on Leetcode and GFG and Codechef  [Leetcode](#)  [GFG](#)  [Codechef](#)
